

JLIA
SUPERVISION OF STUDENTS

Principals are responsible for the supervision of students at all times during school and school-sponsored activities.

Principals have disciplinary authority over the conduct of each student of the school from the time the student arrives at school until the student departs for the day, except during any period that the student is absent from school at the request of his or her parent or guardian.

The driver of a school bus will report to the principal any misconduct of students while entering, leaving or being conveyed in a vehicle under the driver's charge.

According to *The Public Schools Act*, the principal has disciplinary authority over all students of the school:

- a) On their way to and from school, in terms of their conduct towards one another; and
- b) While they are being conveyed to or from school, in a division or district that provides transportation.
